

CO10504: Computer Programming
Lab Assignment #1

Q1. Write a program to calculate simple interest and compound interest.

Q2. WAP that will obtain the length and width of a rectangle from the user and compute its area and perimeter.

Q3. WAP to print an equation in the form $ax + by = c$. Suppose the value of $a=2$, $b=3$ and $c=5$.

Eg: $2x + 3y = 5$.

Q4. WAP using escape sequence:

Print character string using printf() function as given below:

1. Hello "SGSITS".
2. C
PROGRAMMING
3. HELLO
"SGSITS"
4. /C PROGRAMMING\

Q5. WAP to print the output of:

1. a && b
2. a & b

Where $a=2$ and $b=5$.

Q6. WAP to find the largest number from three given numbers.

Q7. WAP to find out the grade of a student when the marks of 4 subjects are given. The method of assigning grade is

per$\geq$85	grade=A
per$<$85 and per$\geq$70	grade=B
per$<$70 and per$\geq$55	grade=C
per$<$55 and per$\geq$40	grade=D
per$<$40	grade=E

Here, per is percentage.

Q8. WAP to calculate the real roots of the quadratic equation.

Q9. WAP to print whether a given number is even or odd.

Q10. If the cost price and selling price of an item is input through the keyboard, WAP to determine whether the seller has made profit or incurred loss. Also determine how much profit he made or loss be incurred.
